

9/20/17

In addition to running the System Performance Data Quality Report and using the information to drive data quality efforts in advance of submission of the System Performance Reports, the Ohio Balance of State Continuum of Care (BoSCoC) HMIS team created custom data quality (DQ) reports. These custom DQ reports permit us to evaluate project and system level data quality in many different ways.

The System Performance Data Quality report submitted in HDX is attached here, as are samples of the Project-level DQ Report and the CoC-level DQ report.

## FY2016 - SysPM Data Quality

	All ES, SH				All TH				All PSH, OPH				All RRH				All Street Outreach			
	2012-2013	2013-2014	2014-2015	2015-2016	2012-2013	2013-2014	2014-2015	2015-2016	2012-2013	2013-2014	2014-2015	2015-2016	2012-2013	2013-2014	2014-2015	2015-2016	2012-2013	2013-2014	2014-2015	2015-2016

## Duplicate Entry Exits

This report pulls all clients that have duplicate Entry Exits. Duplicate Entry Exits are created when the user clicks "Add" instead of clicking the Entry pencil to get back into an assessment. These must be deleted for each member of the household. Please take care to not delete Entry Exits with valid Interims attached.

### Tuscarawas - HARCATUS Tri-County CAO - HCRP RRH(880)

## Questionable Housing Data at Entry

Important: this report could show programmatic issues OR data quality issues. If the data reflects reality, then do NOT change the data. If you are not sure of program rules, CALL US.

This tab checks that Residence Prior is correct for the project's program type. For instance, Rapid Rehousing, PSH, and TH projects require that clients are homeless at Entry. This report will check for discrepancies on all your \*\*adult\*\* clients.

Now that the data elements exist, if your client is showing here because they came from an institutional or permanent Residence Prior, if you go to that client and accurately answer the "Did you stay less than x nights?" and "On the night before did you stay on the streets, ES or SH?" questions and that data indicates that client fits the definition of homeless prior to their entry, the client will stop showing as having "Questionable Housing Data". This will also work for clients who exited prior to these data elements being available; this way you can record the data in HMIS that would confirm that your client was eligible for entry into your project.

### Darke - Community Action Partnership of Greater Dayton - HCRP RRH(919)

Client ID	Child or Adult	Entry Date	Exit Date	Residence Prior to Entry	<90 days?	LH Prior?
131897	A	08/31/2017		Rental by client, no ongoing housing subsidy (HUD)		
201658	A	07/25/2017		Staying or living in a family member's room, apartment or house (HUD)		
202648	A	08/16/2017		Staying or living in a family member's room, apartment or house (HUD)		
Number of clients with questionable housing data at entry:						3
Percent out of 32 total clients:						9.4%

Missing Head of Household

This report pulls any clients that are included in a Household where there is no Head of Household included in the Entry Exit or where there has been no Head of Household indicated in the Relationship to Head of Household field in the Entry Assessment.

Tuscarawas - HARCATUS Tri-County CAO - HCRP RRH(880)

Household: 115820

Client ID	Child or Adult	Entry Date	Exit Date	Household Relationship	Relationship According to Assessment
79133	A	2/1/17		Step-son	
196401	C			Son

202800	C	7/27/17			Self (head of household)

# Missing Client Information

**\*\*This report takes into account the most recent changes to the 2014 Data Standards.\*\***

For the clients with Client Doesn't Know or Client Refused (DKR) answers, please check the files to be sure the client really did not know or refused to answer the question.

If a client is showing with "Questionable" Veteran Status, verify the veteran's exit destination. The two Destinations that only Veterans qualify for are "Rental by client, with VASH subsidy" and "Rental by client, with GPD TIP subsidy". It only checks Heads of Households for this kind of possible error. It is always possible that a non-Head of Household that is in the household is a Veteran. In this case, there would be nothing to correct. Otherwise, it could be that the Veteran Status is incorrect, or it could be that the Destination is incorrect.

If a client is showing "Missing" for Name, it is most likely because the Name Data Quality field is unanswered. To resolve this error, go into the client's record, click the Client Profile tab, then the Client Record pencil. Answer the Name Data Quality field and Save.

## Ross - Ross County CAC - Men's Shelter - ES(755)

# Missing Client Information

If a client shows "Not Correct", that means something isn't right about the data, for example: for RRH projects, your Move-In Date precedes the Entry Date.

If you see "Questionable", it means the answer chosen indicates either a misunderstanding around the data element or an unusual situation. Rapid Rehousing clients should not be entering your project already Permanently Housed, for instance, so any "Yes" answers for "In Permanent Housing" answered at ENTRY will show as questionable. The Rapid Rehousing Entry Date should be the first date these criteria have been met: client has submitted all paperwork, eligibility has been determined, agency has agreed to serve the client, and the client has agreed to receive the service(s). Entry Date does NOT mean the date of Move-In for Rapid Rehousing.

## Butler - Hope House Rescue Mission - Hope House - HCRP RRH(1665)

### Entry Data:

Client ID	Child or Adult	Entry Date	Relationship to HoH	Client Location	County of Residence Prior	County where Client is being Served	Domestic Violence and Related Questions	Move-In Date (RRH Only)	Length of Time Homeless Questions

# Missing Income

\*\*This report takes into account the most recent changes to the 2014 Data Standards.\*\*

For every client record, there are three questions regarding income. The first question asks if the client is receiving income. The second is the client's total monthly income amount. The third is a subassessment where the sources and amounts of income is entered. This report looks at all three questions to determine if they are answered and it looks at whether the answers are in agreement. If the client is receiving income at the time of data collection, the Income from Any Source question should have a Yes, the total monthly income should have a dollar amount, and the subassessment should have a source and dollar amount. If the client is NOT receiving income at Entry, the Income from Any Source should have a No, the total monthly income should be zero, and the subassessment should have a source, no dollar amount, and receiving income source should be set to NO .

This report is divided into two sections: One for Income at Entry, and one for Income at Exit. To correct missing or questionable data at Entry, be sure you are under Enter Data As the correct provider and click the pencil next to the client's ENTRY Date. To correct missing or questionable data at Exit, be sure you are under Enter Data As the correct provider and click the pencil next to the client's EXIT Date.

## Missing Health Insurance

**\*\*This report checks for completeness only for those clients that were either in your project on October 1, 2014 or entered after the new data standards took effect.\*\***

This report is meant to find all client ids where Health Insurance data is incomplete or incorrect. For every client record, there are two questions for Health Insurance. The first asks if the client is covered, the second is a subassessment for the Health Insurance types. This report looks for missing data and checks that the two questions are in agreement. If the client is covered at data collection, the subassessment should have a type. If the client is not covered by health insurance, the subassessment records should reflect that.

This tab is divided into two sections: one looking at Health Insurance data at Entry and the other looking at that data at Exit. To correct missing Entry data, go to the client's record and click the pencil next to the ENTRY DATE, and to correct missing Exit data, go to the client's record and click the pencil next to the EXIT DATE.

### Defiance - Northwestern Ohio CAC - HCRP HP(934)

#### Missing Health Insurance at Exit

## Missing Disabilities

**\*\*This report checks for completeness on adults and children for all program stays.\*\***

For every client record, there are two questions regarding disabilities. The first question asks if the client has a disability. The second is a subassessment into which the user adds a record for each disability type.

This report is divided into two sections. The first looks at both parts of the Disability data to determine if they are answered and whether the answer to the "Does the client have a disabling condition?" question is in agreement with the subassessments.

The second section looks at two things:

Each individual subassessment record has a number of "If Yes, ..." questions that are supposed to be answered for each condition the client has. If any of these questions are skipped, that will show in the second section.

The Disability Types of "Physical/Medical", "Other", or "Dual Diagnosis" are not "HUD" disability types. These used to be choices in the Disability Type dropdown and did not have "(HUD)" at the end. The problem is these answers do not pull into any HUD reporting and therefore should not be used. We are recommending that users account for any non-HUD Disability Type by creating a new subassessment record with a HUD Disability selected. Once this is done, users may delete the record with the non-HUD answer.

This report currently only looks at Entry Data, so corrections should be made through the ENTRY pencil.

## Missing Disabilities

203971	A	8/16/17		No (HUD)	1	No
Clients with Missing or Incorrect Data:						14
Percent out of 131 total clients:						10.7%

#### Disability Data Completeness

Client ID	Child or Adult	Entry Date	Exit Date	Disability Type	"If Yes" Questions Answered?
193112	A	7/24/17		Mental Health Problem (HUD)	No
196328	A	4/4/17	5/10/17	Drug Abuse (HUD)	No
203812	A	8/24/17		Mental Health Problem (HUD)	No
	A			Physical (HUD)	No

## Future Entry Exits

Users should not be entering Entry Dates or Exit Dates that are in the future.

To correct this, edit the date by accessing the client's record and clicking the pencil next to the date in question. If you have an Entry/Exit showing on this report that was created ahead of the actual Entry or Exit, and the date is correct, it is ok to leave it alone, but going forward, please wait to enter Entry Dates and Exit Dates for when the client actually enters or exits your project.

Keep in mind that Entry Dates for residential projects (PSH, ES, TH, SH) should equal the date of move-in, whereas Entry Dates for RRH projects reflect when the client began working with a case manager to get housed.

### Ross - Ross County CAC - Men's Shelter - ES(755)

Client ID	Date Added	Entry Date	Exit Date
171007	2/7/17	7/25/17	8/30/17
Number of client that have Entry Exits in the future:			1
Percent out of 1 total clients:			100%

## Incorrect Entry Exit Type

Clients with an incorrect Entry Exit Type do not get counted in HUD reporting. The typical Entry Exit Types that are used are either "HUD" or "VA".

To correct, access the client's record, find the Entry Exit in question, click the pencil next to the Entry date, click Save & Continue, change the Entry Exit Type at the top of the screen, then click Update, and Save & Close.

### Ross - Ross County CAC - Men's Shelter - ES(755)

Client ID	Entry Date	Exit Date	Entry Exit Type
4536	1/9/17	1/17/17	Basic Center Progr
195365	1/23/17	1/24/17	Basic Center Progr
