

THE BRAVE BUTTON

Smart buttons for buildings that connect people at risk of overdose to staff support.

1. Housing residents can request support or by pushing the Brave Button in their rooms.
2. Button pushes trigger a text message to peer workers or building staff, requesting an in-person check-in on the resident.
3. After 2 minutes, a reminder text is sent and support workers can respond to confirm that the resident has been checked on and is safe.

ONGOING PROJECT HIGHLIGHTS

Button Project at RainCity Housing in Vancouver: Dec. 2018 - Ongoing

Brave Buttons installed in 21 rooms at an all-women’s supportive housing building.

One-on-one interviews with staff and residents, and data from button presses, demonstrates effective use of button system for connecting residents to staff support.

ONGOING PROJECT HIGHLIGHTS

IMPLEMENTATION PROCESS

CO-DESIGN/ONBOARDING

Consultation with building managers, staff, and residents to adapt system

Training building staff to use responder phone (1 week prior to pilot launch)

Pilot manager to support staff during first week of pilot

Instructional materials to be in place for reference throughout the pilot

TESTING/INSTALLATION

One week for button range testing and installation.

Enclosure system installation

Button installation in rooms

Phone system installation

Installation of informational materials

ONGOING ENGAGEMENT

Opportunity for staff feedback during initial onboarding/training sessions.

Opportunity for staff to comment on system as part of chatbot flow throughout pilot

Online feedback form to be filled out by staff every 2 weeks.

WHAT GOES IN THE BUILDINGS?

1 Brave Button + 1 Button Sticker per room

1 Brave Responder Phone + Information Guide

1 Brave Hub per 10 Brave Buttons

Brave Informational Posters
