START WITH DATA: ANALYZING RACIAL DISPARITIES IN THE HOMELESSNESS SYSTEM

Clifton Harris
WHERE WE STARTED

Could current data identify racial disparities in our system?

Does HMIS data reflect the current housing and income factors in our community?

If the homeless data was significantly different than the other community data, would we be able to determine the cause of that?

If the data is comparable, is that sufficient evidence that there is no disparity?
What Does The Data Tell Us?

HOW IS NEW ORLEANS DOING?

Nearly half of all black families (47 percent) earn less than $25,237 a year. The same was true for only 14 percent of white households.

Compared with white households, black households in New Orleans earned 63 percent less on the median. Hispanic households earned 47 percent less.

Nearly half of all African-American children live in poverty. That is true for only 9 percent of white children.

41 percent of black households in New Orleans own their homes, compared with 54 percent of white households.

More than half of all renters in New Orleans spent 35 percent of their income or more on housing in 2016. Nearly 60 percent of black residents in New Orleans rent.

UNITY RACIAL AND ETHNIC DISPARITIES TASK FORCE

Formed in August 2018
Create an action plan to monitor and address racial and ethnic disparities

Comprised of employees from different staff levels, service types and sub populations served within the COC.
Analyze COC data to identify potential disparities
TASK FORCE
GOALS AND ACTION PLAN

Expand outreach efforts in geographic areas with higher concentrations of underrepresented groups into underserved communities.

To develop educational material on creating greater racial and ethnic diversity for homelessness in the CoC.

Examine emergency shelters and how race disparities play in access.

Review coordinated entry processes to understand their impact on people of different races and ethnicities experiencing homelessness.

Review By-Name List and Housing placements to identify potential disparities

Create Data Collection plan
• Improve outreach data to include non COC funded outreach program that serves Central Business District and French Quarter.

• Use Racial Equity Tool to track individual emergency shelters.

• Racial and ethnic breakdown of landlords that participate in permanent housing placement.

• Track race and equity data on youth and gender

• Include 3 to 5 assessment questions to HMIS entry to take further look into client experiences within homeless services.
DISPARITY RELATED ASSESSMENT QUESTIONS

- When did you originally move to the New Orleans area?
- Zip Code or City of Last Permanent Address
- Are you more comfortable staying on the street versus a shelter?
  - If so why?
- Primary reason for homelessness?
- Have you ever been in foster care?
Limited resources to collect data

Current required data for federal reporting and coordinated entry

Scope of data focused on outcomes that homelessness system can directly change

POTENTIAL CONCERNS AND CHALLENGES
THANK YOU
