

2021 Quarterly Performance Report

Q1 Executive Summary

As outlined in the [Ohio Balance of State Continuum of Care's \(BoSCoC\) Performance Management Plan](#), the CoC provides this summary of system and project performance as a means to highlight any important trends or observations. Providers may access their detailed project performance data at any time via [R minor](#) and [R minor elevated](#).

At the project level, in terms of Length of Stay, the majority of ES and TH projects are meeting their respective goals for average number of days. Specifically, 69% of Emergency Shelters are meeting the goal of no more than 40 days in shelter. And 95% of Transitional Housing projects are meeting their goal of no more than 240 days in shelter.

In terms of Exits to Permanent Housing, the only project type where the majority of projects are not meeting the goal is Transitional Housing (TH). Currently, 41% of TH projects are meeting the goal of having at least 83% of households moving into permanent housing at exit, compared to 46% during Quarter 1 of 2020. Also worth noting, 52% of Emergency Shelters are meeting the goal of having 40% of households move into permanent housing at exit. This is down 21% from this time last year when 73% of ES were meeting this goal. This is likely due to the eviction moratorium and low affordable housing stock available across the BoS.
